

BOOMASoft Form Management Tool

BOOMASoft has released the beta version of BOOMA WebForms. With it, website developers can create forms in minutes using drag-and-drop technology. No knowledge of CGI (Common Gateway Interface) scripting, Java or database programming is required.

BOOMA WebForms also includes an auto responder that enables users to create automatic responses which will be sent immediately to those who submit forms.

The tool is available for Win95/98 and WinNT4.

The retail price is \$99, and the complete product will be available in August. Order it before the public release and you can save \$50. The beta version is available online at boomasoft.com.

A Really Nasty Virus

Reports of the CIH virus, also known as the Win 95/CIH, Win 95.CIH have, luckily, been sparse.

The virus strikes on the 26th of every month, and it affects both Win95 and Win98 PCs.

It scrambles the boot data of the PC hard drive making the system unbootable until the damage is repaired. On some PCs the virus can scramble the BIOS data of the motherboard, requiring an EPROM burn or a new motherboard.

The latest updates of most anti-virus scanners, such as Network Associates' VirusScan and Symantec's Norton AntiVirus, will find and correct the virus on damaged PCs. Find VirusScan at nai.com.

CPA Continuing Education

The MD State Board of Accountancy grants continuing education units (CEU) for Damar Group classes.

CPAs, this is a reporting year. CEU credits earned at Damar Group will help you meet your professional training requirements.

Multi-Page Printing

Single Track Software has released an update to FinePrint, the Win95/98 print driver that prints up to 8 pages on a single piece of paper - without sacrificing legibility!

Version 3.10 is now available. In addition to printing multiple pages, FinePrint adds borders and watermarks to documents.

FinePrint is one of our recommended apps for all Windows users.

Access Tip

Locate data quickly with Access' "Find" function. Use either the <Ctrl-F> keystroke or the binoculars icon on the toolbar to open the "Find" dialog window.

In **Access, Level 2** you'll learn to join multiple tables to create relational queries and reports. Called *normalizing the data*, this is required knowledge for all users!

Word Tip

Link PowerPoint and Excel charts right into the body of your Word documents. Don't recreate them; let them update themselves!

In **Word, Level 2** you'll get to hotlink Excel charts into Word. You can even do this across the network or Internet. For all Word users, this is a must-have class!
