

Kinda Like Aunt Edna

Backing up your computer data is about as much fun as sitting next to old Aunt Edna at Thanksgiving dinner.

But unless you're doing it every day, you're asking for trouble.

More than 300,000 insurance claims are filed each year following natural disasters...guess which electrical appliance in your home or office is most likely to suffer serious damage from a lightning strike?

Ok, if you agree that you should be backing up your data, and doing so isn't much fun, what's the best option?

We strongly recommend that you have a tape system that's capable of storing *all of* your data on a single tape. That's right...get rid of those old incremental backup systems and
