

Netscape Now Free!

Netscape Navigator, the most popular Internet web browser, is now free for both personal and commercial use.

The complete Communicator package, designed for corporate use, is discounted to \$29.95, it's great if you want all the extra programs, but the web browser is what most of us want, and it's free!

Update Your Office

Microsoft offers a free update service for users of MS Office. Updates to the popular Office 97 (for PCs) and Office 98 (as yet, only for Macs) are posted online at microsoft.com/office/. Check it out and update your software!

Registry Maintenance

The best idea we can pass on is to maintain your Win95 registry and keep it backed up. One slip of an errant software installation, and you can say good bye to your Windows 95 settings and all the apps and data you've been using.

Microsoft has published two programs to help keep your Win95 registry in top form.

RegClean 4.1 looks for and fixes errors in the system registry.

Config Backup lets you keep multiple backups of your registry files. For extra security, you can even copy the backup registries to a floppy!

Both programs are free. We collected them from Microsoft and posted them to our ftpserver.

Get 'em both at [ftp.dgl.com](ftp://dgl.com).
